Experience

Box, Redwood City- *Software Engineer Apprentice* (December 2021 - Present)

- Manage projects including A/B testing using Behavior Driven Development techniques and collaborate with teammates to release to end user customers
- Build, program, and test pricing and signup pages as a part of the e-commerce team
- Responsible for maintaining flows that involve account and billing, up/downgrading Box services, from an end-user experience perspective, and from end-to-end
- Program and test customer notifications related to any and all transaction flows
- Collaborate with members of other departments; leverage third-party tools particularly those related to marketing, data-science, and quality assurance

Unleash, Remote - *UI/UX Designer* (July 2021 - Present)

- Design user flows, wireframes, prototypes and mockups for mobile apps, including login/account/event pages, chat screens, articles and tutorials.
- Design wireframes, prototypes and mockups for website landing pages
- Research target markets to build a better user experience.

Carbon Origins Inc., Remote - *App Team Lead* (June 2021 - September 2021)

- Design and implement the Company's website, app interfaces, and online food ordering features using Webflow, Figma, and Adobe XD
- Conduct JTBD (Jobs to be done) interviews with food delivery service customers/drivers to solicit feedback to help further develop Carbon Origins' services.
- Use various management tools in order to drive efficiency within the UI/UX team in addition to managing the Company calendar including events and meetings

Languages

Fluent in Mandarin and English, basic Japanese and Taiwanese Hokkien
